

Personal Armour

Helmets, Armour Plates & Tactical Shields

NP Aerospace manufactures an extensive range of ultra-lightweight, high performance personal armour products for defence and law enforcement. Designed to meet the protection requirements of standards including NIJ, products include ballistic helmets, shields and body armour plates. NP Aerospace introduced the first combat helmet for the British army in 1979 and has continued to extend the range of personal armour products used by world leading defence organisations.

Ballistic Helmets

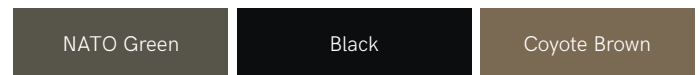

NP Aerospace ultra-lightweight composite helmets combine class leading fragmentation performance with advanced ergonomics for tactical and combat operations. High cut and full cut options are available in multiple sizes and colours weighing from 1.25kg. Helmets meet the protection requirements of NIJ 0106.01 (up to Level IIIA). Optional tactical add-ons are available. NP Aerospace has manufactured over 1 million helmets for UK, Canada, Italy and NATO allies.

Ballistic Armour Plates

NP Aerospace plates include covert variants for special operations, lightweight buoyant plates, and hard armour plates with high grade ceramics to meet NIJ Level IV+ special threats. They are available in stand-alone and in-conjunction configuration, shooter cut and full cut and weigh from less than 1 kilogram for a medium plate. Plates meet the protection requirements of NIJ 0101.04 and NIJ 0101.06 and other threats ranging from 5.56x45mm to 7.62x63mm. NP Aerospace has manufactured hundreds of thousands of body armour plates to British and Canadian Armed Forces.

Tactical Shields

NP Aerospace tactical shields offer lightweight multi-hit bullet and blast protection for high-risk tactical teams to NIJ Level III + special threats. A range of designs are available with viewports, weapon rests, and adjustable lightweight ballistic handles for optimum manoeuvrability. RAID Lighting and camera systems can be fitted. Shields meet the protection requirements of NIJ 0108.01 Level III+ Special Threats including 5.56x45mm M193 & 7.62x39mm M43/M67. They offer lightweight protection at 3.28 psf (16kg/m²) and blast fragmentation at 17gr FSP V50 >1400m/s.
